Retail Packaging

As an online retailer we sell our standard bead mosaic kits conveniently packaged in heavy-duty easy to carry bags. We know that bags are not always the best solution for a retail storefront situation so all our kits are also available in a retail box. We want to accommodate your needs and preferences. The thick clear plastic professionally branded boxes have pre-punched holes for hanging and measure 9"x 12"x 1.5". Both have large images of the finished product on the back and a lifestyle picture on the front making it easy for customers to visualize their final piece.

All kits include written and video instructions, design sheet, MDF board, Art Edge strips, beads, Skinny Glue and a Bead Brave sticker.

Toolkits are recommended for first time users and are sold separately, however, as a service we also offer the kits as a bundled product with the toolkits packaged inside with the kit and labeled. This saves shelf space and makes it easier to ring up products at checkout. When placing your order be sure to specify your preference.

We are able to custom design kits specifically for you. Please ask about minimum quantities, and cost details for this service.
